### ENVIRONMENTAL PHILOSOPHY

Can thinking about a natural world enrich the way we see and understand ourselves as living beings and as humans? Being a part of the modern technology civilisation we participate in a massive process of changing the planet (which some cherish while others condemn) and in return - changing ourselves. The latter part is often overlooked, but only when we know who we want to be, we can make decisions on how we want to live. In this lecture we will show how adding the environmental factor to philosophy can broaden the outlook and show us a new, perhaps better, way of being in the world.
